

ESTIMATOR

RETAIL ENVIRONMENTS

Full Time | Toronto/GTA

Assess. Develop. Explore. Analyze. Formulate. Deliver.

Our client is a leading manufacturer of retail and custom environments located in the GTA. This organization is known in the industry for their commitment to quality and delivery. Their portfolio includes leading brands across Canada.

The company takes pride in developing innovative spaces with the ability to blend multi-materials in a creative fashion that produces unique environments. At their core, they are experts in millwork, metal, glass and acrylic production.

While consistently exceeding client expectations, they have achieved tremendous success and continue to experience growth. As a result, they are looking to add a diligent and dedicated Estimator to their team.

The Role Overview:

The Estimator partners with all functions in the organization to prepare competitive bids in line with all company objectives including labour, material and delivery. The Estimator has a diverse, creative and technical background familiar with production process, multi-material products and design along with the ability to price effectively to win business.

The Key Focus:

- A methodical approach to pricing programs by formulating and developing labour, material and all other associated costs for the manufacturing of commercial, high-end residential and retail environment projects
- Partners with all functions including sales, project management and engineering to ensure margins are maximized with accurate costing
- Compiles and maintains data for clients/projects, evaluating overall success of project bids
- Collaborates with production to perform time studies, learn new manufacturing methods/ processes (Lean) to improve efficiency and effectiveness
- Prepares, reviews and delivers quotes in detail to ensure accuracy and completion of estimates on time

Qualifications & Skillset:

- A Degree or Diploma in Business, Accounting, Engineering or a related field
- Minimum 5 years' estimating experience in custom millwork, store fixtures, retail environments, custom residential and/or commercial projects
- Knowledge of manufacturing/process engineering, finishing aspects of wood and metal fabrication, design, detail, engineering and BOM generation
- Strong mathematical aptitude
- Able to quickly analyze, compare and interpret detailed information
- Able to make sound judgments based on the best available information
- Store fixture experience is highly preferred
- Highly organized with strong attention to detail

This is a once in a lifetime opportunity for the right Estimator. Our client has set the mandate to shape the future with limitless boundaries. For inquiries, please contact Krista at krista@podgroup.ca. For additional information, please visit www.podgroup.ca.
