

TECHNICAL DESIGNER

HVAC & Fire Protection Systems

Technical Drive. Design. Detail. Deliver.

Our client is a North American-based manufacturer specializing in supplying fire-rated systems and assemblies to the industrial, commercial and institutional market sectors.

Relying on over a half century of proven performance and utilizing the engineered properties of their patented fire-resistant sheet, our client provides passive fire protection solutions for telecommunication and electrical power utilities, petrochemical, mining and resource industries, transportation industry and off-shore oil and gas platforms.

ROLE OVERVIEW:

As a customer-centric organization, our client has achieved tremendous success and continues to experience growth. As a result, they are in search of a technical, hands-on drafter to fulfill the role of the **Technical Designer**. This is an exceptional opportunity for an individual who is looking to develop their experience base and grow within a dynamic and great environment!

KEY FOCUS:

- Design HVAC layouts using AutoCAD 3D
- Develop and maintain 3D part libraries
- Effectively prepare and interpret conventional CAD engineering drawings, manufacturing drawings, and specifications
- Employ an applied approach based on a comprehensive understanding of technology

SKILLSET & QUALIFICATIONS:

- Engineering Technologist Diploma or equivalent
- Strong knowledge of AutoCAD 3D
- Ability to effectively use MS Office suite
- Strong time management and multitasking ability
- Excellent oral and written English communications skills
- Ability to work effectively in a multidisciplinary team and interact with staff at various levels of the organization
- General knowledge of HVAC
